

Press Release

Experience modern methods of particle and dispersion analysis and materials testing for yourself

Exclusive additional courses at ICDAMT 2024

Berlin, 22 January 2024:

On June 10th and 11th, 2024, LUM GmbH will host the next International Conference on Dispersion Analysis and Materials Testing (ICDAMT 2024) in Berlin. Participants are exclusively invited to take additional practical training courses on June 12th at the LUM headquarters in Berlin-Adlershof and thus experience modern methods of particle and dispersion analysis and material testing for themselves. The training courses represent a further training measure for employees of certified companies (DIN ISO 9001 and other relevant standards).

European experts from LUM GmbH, Berlin and LUM France each train a maximum of four course participants on the following topics in theory and practice:

1. Accelerated and real-time stability of formulations - testing methods & strategies, correlation
2. Comprehensive characterization of battery & energy storage materials
3. Determination of droplet size, particle size distribution & particle properties
4. Relative sedimentation time for Hansen Parameters (HSP/HDP)
5. Analytical centrifugal filtration.

Registration for the 2024 conference and exclusive places in the additional training courses is ongoing. All details can be found on the conference website: <https://conference2024.lum-gmbh.com/>.

You can get an insight into the training content of the courses on the LUM-YouTube channel <https://www.youtube.com/channel/UCfa16PEob93aCGWa7YXRlHQ>. The conference and courses will take place in English. We look forward to your participation.
